Grow Beautifully

Nurturing

Bountiful Blue® Blueberry

Moms naturally connect with the rhythm of nature, and this blueberry not only feeds us with the biggest, sweetest berries, but it is also an important food source for spring pollinators, who feast on the nectar-rich blooms. Great in containers.

CARE: Provide rich, acidic, well-drained soil. Water deeply and regularly during the first growing season to establish an extensive root system. In extremely hot, arid summer areas, provide some shelter from harsh, reflected afternoon sun. Before new growth begins, prune off twiggy growth, leaving only main stems to prevent overbearing.

Mom, thank you for always nurturing me and showing me the magic of nature.
