 MONROVIA®

*Grow Beautifully*

## Unflappable

### VIBE® Ignition Purple Salvia

Just like a mother, no amount of drama—in this case, from heat, drought, or humidity—stops this brilliant purple sage from doing its thing. Masses of flowers from spring throughout summer make it ideal for a water-wise border.

---

**CARE:** Thrives in lean to average, loose, well-drained soil. Benefits from light afternoon shade in hot southern climates. Water deeply and regularly during the first growing season. Reduce frequency once established. Feed sparingly; high nutrition hinders flowering. Remove spent flowers to promote continued bloom. Prune to a few inches above ground after the threat of frost. Pruning time: spring.

You are beautiful, resilient, and  
never cease to bring joy to those around you.

BASICALLY, YOU ARE ABSOLUTELY,  
WONDERFULLY YOURSELF.
